ABOUT AVALON HEALTH

With a track record of operating dozens of multi-year COVID-19 testing programs in K12 school districts and COEs throughout California, reaching over 500,000 students, staff, and community members, Avalon Health is dedicated to closing the gap in student healthcare access.

Our commitment, along with our school-based health services, extends to the opening of pediatric and urgent care offices further supporting the communities we serve.

MEDICAL LEADERSHIP

Avalon Health's distinguished medical leadership include a Stanford and UC Berkeley alumni who served as the Public Health Commissioner of Alameda County and established one of its first school-based health centers, and a Lifetime Achievement Award recipient.
